ABOUT ME

Detail-oriented undergraduate with a strong interest in Software Quality Assurance and testing. Passionate about improving software quality through manual testing, bug reporting, test case design and basic automation using selenium and playwright. Familiar with SDLC, STLC, Jira, Postman, and basic API testing concepts. Eager to learn new technologies, work collaboratively in Agile environments, and begin a career as a QA Engineer Intern in the software industry.

-

PROJECTS

- **Simple - Calculator** : Designed and developed a responsive Calculator Web App as a front-end project using HTML, CSS, and JavaScript. Demonstrated skills in UI design, event handling, and core programming logic.
 - **My Personal Portfolio website** : Designed and developed a personal QA Engineer portfolio website to showcase skills, projects, and experience built using HTML, CSS, and JavaScript.
 - **Cinema Seat Reservation System** : A web-based system developed using HTML, CSS, JavaScript, PHP, and MySQL that allows users to view movies, select seats, and book tickets online.
 - **FCT-TUTOR** : The Faculty Tutoring Center Management System is a web-based platform designed to simplify and automate tutoring center operations. It allows students to register for tutoring services online, manage courses, view announcements, and track performance while helping the faculty efficiently manage tutoring sessions and student support with reduced paperwork.
